RFID Solutions by WAKE, Inc.

NOW YOU CAN KNOW
When   How   Where   What is happening to your assets at all times!

SmartCoil

SmartCoil using RFID tags allows you to know precisely where all of your Coils, Slabs, or Flat Sheets of metal are at all times.

We use Identec Solutions RFID tag, which will give you a tremendous read/write range and capabilities.

Our **SmartCoil** system will work in Steel Mills, Steel Warehouses, and stamping plants. We can communicate with your current databases or build its own. Because we use Identec Solutions, Intelligent Long Range (ILR) transponders, we can offer you capabilities not available using any other RFID solutions.

"I just can't believe it, no other system would work in our environment!"

Contain: RFID Container Management System

Savings in the millions can be achieved with our **Contain**, a wireless RFID system. Without human interventions, it can provide you with the right part (container), at the right time, in the right place.

Using our wireless RFID technology by Identec Solutions, you can keep precise information on all your containers regardless of the quantities, be it 600 or 600,000!

"ROI is in months, not years!"

Vehicle Tracking Using RFID

Track all the comings and goings of all the vehicles at your plant, including the trailers as well as the tractors! Read more...

Can be combined with GPS technology.

Concrete Maturity using RFID

Using this system, you can make your concrete talk to you; it will tell you how hard it is and how it is curing. You will get Quality Assurance real time information plus be able to document the curing temperatures at your selected intervals.
